

# TAILHOLT METRO DISTRICT

April 21<sup>st</sup>, 2021

Hello,

**Question:** When will we be able to water our yard?

**Non-potable water will be normally turned on the first week of May.**

**This year the Non-potable water will be turned May 4<sup>th</sup>, 2021**

The Tailholt Metro Districts non-potable water system gets its non-potable water from natural run off, the local rivers, reservoirs and ditch companies from around the area. When the Tailholt Metro District gets non-potable water for the District's non-potable water system all depends on the spring runoff, river levels and level of the storage facility.

The District does not get dates as to when this will happen, because no one knows. Once run off or the "river water comes in", the District will re-fill Franklin Lake; our non-potable storage reservoir. Then fill pump house wet well, test pump system and fill main lines.

**Remember to set your irrigation clock  
to the 3-day non-potable watering schedule.**

The 3 day a week watering schedule is be posted on the web site and sent out by e-mail through the District web site, you must join the THMD web site to get this watering schedule and all District notifications.

Keep in mind: May will still have nights/days below 32 degrees, which may freeze parts of your irrigation system and cause damage. **Turn your home irrigation system on when you feel comfortable with predicted forecast and temperatures.**

**The 3<sup>rd</sup> Friday of October (Every year) the District will turn off the non-potable water system.**

**\*\* Do not go into the District meter pit \*\***

If your non-potable water is not working **during your scheduled watering time**, please check the following:

1. Your main water valve after the District meter pit is on.
2. Rain sensor is not full of water.
3. You have your irrigation clock set to water at the same time as the watering schedule for your area.
4. Check your irrigation clock for am and pm and have irrigation clock set to the correct year.
5. Check back up battery supply.

## THMD Non-Potable Home Irrigation Schedule

ZONE COLOR	DAYS OF THE WEEK	WATERING TIMES as of 5-1-19
PINK:	WED, FRI, SUN	7:00 A.M. To 11:00 A.M. 3:00 PM To 7:00 PM
ORANGE:	TUES, THURS, SAT	7:00 A.M. To 11:00 A.M. 3:00 PM To 7:00 PM
GREEN:	WED, FRI, SUN	7:00 A.M. To 11:00 A.M. 3:00 PM To 7:00 PM
PURPLE:	TUES, THURS, SAT	7:00 A.M. To 11:00 A.M. 3:00 PM To 7:00 PM
YELLOW:	WED, FRI, SUN	7:00 A.M. To 11:00 A.M. 3:00 PM To 7:00 PM
BLUE:	TUES, THURS, SAT	7:00 A.M. To 11:00 A.M. 3:00 PM To 7:00 PM

THMD Non-potable water is supplied by the local river system and/or ditch systems to deliver water.  
 THMD or the Ditch Company does not know when the river water comes in and/or when there is enough water to fill our non-potable water storage pond. (All depends on weather)

Non-potable water system shuts down the 3<sup>rd</sup> Saturday of October, you blow out your own Irrigation system.
